

ROHAN DESAI

DevOps Engineer | Site Reliability Engineer

+91 8970143354 | rohandesai216@gmail.com | [LinkedIn](#)

Summary

DevOps professional with **4 years** of experience designing and managing scalable cloud infrastructures supporting millions of users. Proven success in deploying and optimizing microservices to enhance reliability and performance, while streamlining release cycles through automation and CI/CD practices. Experienced in developing automation scripts and configuration templates to eliminate repetitive tasks, reduce manual effort, and accelerate deployments. Adept at strengthening system security and compliance, implementing proactive monitoring solutions, and supporting mission-critical production environments through disaster recovery planning and rapid incident resolution. Recognized for delivering resilient, high-availability solutions and collaborating across functional teams to ensure seamless production performance.

Skills

- **Cloud Computing Platform** - AWS
- **Monitoring and Logging** - Datadog, Dynatrace, OpenSearch, Quantum Metric, CloudWatch
- **Containerization & Orchestration** - Docker, Kubernetes, ECS
- **CI/CD** - Jenkins, GitHub Actions
- **GitOps** - Argo CD and Helm Charts
- **IaC** - Terraform, CloudFormation
- **Scripting Languages** - Python, Yaml
- **Security & Compliance** - Wiz, SonarQube
- **Configuration Management** - Ansible

Professional Experience [Total 4 Years]

DevOps Engineer | 08/2022 - Present

DXC Technology | Bengaluru, India

Key Achievements –

- Designed and managed scalable **AWS** environments (EC2, ECS, RDS, ElastiCache, VPC, Route53, S3, CloudFormation) supporting millions of users with high availability and security.
- Deployed and optimized microservices on **ECS clusters**, improving service reliability and performance.
- Built and maintained **GitHub Actions pipelines**, enabling faster, error-free deployments and reducing release cycle times.
- Supported critical Production releases and deployed services using **Cloud Formation** templates by manually through CLI.
- Implemented proactive monitoring solutions with **Datadog, Dynatrace, OpenSearch, Quantum Metric, and CloudWatch**, cutting incident response times and improving system uptime.
- Assisted with **Disaster Recovery** planning by conducting regular backups and Deployments.
- Developed **Python and YAML scripts** to eliminate repetitive tasks, reducing manual effort and boosting operational efficiency.
- Strengthened defenses by identifying and remediating vulnerabilities with **Wiz and SonarQube**, ensuring compliance with industry standards.
- Delivered 24/7 on-call rotation production support, resolving **P1/P2 incidents** quickly through cross-team collaboration, minimizing downtime and ensuring business continuity.

Project

DevOps Implementation for Academic Notes Portal | 2021 - 2022

Overview-

Designed and deployed a cloud-native web application for storing and managing academic notes and documents categorized by subjects as per branches. Implemented modern DevOps practices to automate infrastructure provisioning, application deployment, and security throughout the software delivery lifecycle.

Key Achievements –

- Provisioned and managed **AWS** cloud infrastructure using **Terraform (IaC)**.
- Containerized the application using **Docker** and orchestrated workloads with **Kubernetes**.
- Built and automated CI/CD pipelines using **Jenkins** for continuous integration and deployment.
- Implemented **GitOps** practices using **Argo CD** and **Helm Charts** for automated Kubernetes deployments and configuration management.
- Automated server and application configuration using **Ansible**.
- Integrated **SonarQube** for static code analysis, code quality checks, and security vulnerability detection.
- Managed source code versioning and collaboration using **Git**.
- Ensured high availability, scalability, and deployment consistency across environments.

Education

Bachelor of Engineering (Mechanical) | KLS's Gogte Institute of Technology, Belagavi.

Graduated: 2022 | CGPA: 8.71

Certifications

- AWS Certified Cloud Practitioner (CLF-C02)
- Cambridge English Certificate (ESOL)
